

At Healthway we have a vision of a world where the indoors is as refreshing as the outdoors. Inside our Central New York headquarters, the most determined and creative minds in the industry are hard at work developing solutions to make this vision a reality. Whether it's an office space, retail store or hotel, our revolutionary air purification systems will eliminate 99.99% of captured particles from the air with unmatched efficiency. Because your health and wellness is our number one priority.

## Protecting the world from airborne viruses for nearly 40 years.

The only way we can combat rising infection levels is with rising innovation levels. This has been Healthway's philosophy since 1981. It drove us to develop the most powerful air-purifying technology in the world. It ensures we'll never stop looking for what's next.

Our team of doctors, engineers and scientists have been in the commercial air quality business for decades, developing exclusive technologies for products used in a wide variety of settings where air quality is critical.

We are committed to being a leader in indoor environmental solutions, to never stop seeking new ways to maximize efficiency and respect our environment, and to make a profound impact on the health and well-being of our customers.

The most powerful air purification technology – proven to trap and eliminate dangerous viruses.

At HealthWay, we develop technology with a sense of responsibility – it's up to us to protect the health and well-being of our customers, now more than ever.

Our award-winning, state-of-the-art Disinfecting Filtration System (DFS), has been rigorously lab-tested and has proven to remove Covid-19 size viruses (SARS-CoV-2) almost completely from the air. According to numerous tests conducted by a private lab, 99.987% of airborne particles were eliminated in just 10 minutes when using a DFS air purifier.

## The perfect purifier for every indoor space.

2000SC 1200SC not shown

Self-Contained Independent Blower The modular design of these self contained units applies our DFS technology to any airflow criteria, and due to its independent blower, it can retrofit with any HVAC system. It can also be installed as a standalone unit above ceiling space to treat targeted areas.

Patented DFS Technology 99.99% Filtration Efficiency down to 0.007 microns Zero loss – restriction of airflow Four times the filter loading capacity than a HEPA filter Improved energy savings compared to HEPA

Nominal Flow – 2000 CFM and 1200CFM

VOC Adsorption | Photo Catalytic Oxidation (optional)

2000IL 1200IL not shown Inline System- No Blower Nothing gives engineers the freedom of the Inline Series; which can be custom-fitted during the design stage of any HVAC system.

Patented DFS Technology 99.99% Filtration Efficiency down to 0.007 microns Huge energy savings compared to HEPA filters Modular design meets any airflow criteria Three times longer filter life than HEPA Filtration

950P Commercial Portable The 950P packs all the powerful, virus-trapping performance of DFS technology into a high-powered unit meant for larger commercial spaces.

Delivers high CFM with low energy consumption

Mobile Design – built in 3.5" safety lock swivel casters, full-width handle for easy movement

Multiple Fan Speeds – four fan speeds for ease of control

99.99% DFS Filtration Efficiency – down to 0.007 microns

Independent Airflow/Distribution Control – to facilitate placement anywhere in the space

Patented V-Bank Filter – increases surface area and provides higher dust loading capacity

Ease of Maintenance – quick release filter access from the back of the unit

Healthway also offers state-of-the-art, DFS-powered portable purifiers, designed for smaller spaces like conference rooms and offices. Visit healthway.com to learn more.
